

Section 1 - Prompt

Act as a professional resume writer and career coach specializing in entry-level engineering placements. Create a strictly one-page resume using the exact personal details provided below.

Formatting & Style Constraints (CRITICAL):

- Style: Modern, clean, minimalist.
- Length: Strictly one page only. Do not exceed one page.
- File Type: Provide the output in plain text with clear markdown formatting (using `` bold `` for headers and ``-`` for bullets). Do not use complex columns or tables.
- Optimization: The resume must be ATS (Applicant Tracking System) friendly. Use standard section headings only.

Candidate Details:

- Full Name: Kille Christian L. Barreda
- Email: barredakille@gmail.com
- Phone: 09094743104
- Location: Altezza Grande, Catalunan Grande, Davao City, 8000.
- LinkedIn/Portfolio: <https://github.com/kclbarreda>

Education:

- Degree: Bachelor of Science in Civil Engineering
- University: [Ateneo De Davao University]
- Graduation Date: [May 2027]
- Relevant Coursework: [INSERT 4-6 CLASSES - e.g., Structural Theory, Fluid Mechanics, Construction Materials, Geotechnical Engineering, AutoCAD, Project Management]

Experience & Projects (Crucial Instruction):

The candidate has no formal paid work experience . Therefore, you MUST substitute the "Work Experience" section with "Academic Projects & Affiliations" .

In this section, create 2-3 compelling project entries based on typical Civil Engineering undergraduate activities. Use placeholders for me to edit later. Examples:

1. Capstone Design Project | [Insert Date]
 - [Describe a hypothetical project like "Design of a Two-Story Residential Structure" using software like STAAD or AutoCAD.]
 - [Mention collaboration, calculations, and cost estimation.]
2. Construction Materials Testing Lab | [Insert Date]
 - [Mention performing slump tests, sieve analysis, or concrete cylinder testing per ASTM standards.]

Skills Section:

Please categorize the skills for clarity based on the provided keyword "realistic" for a fresh grad.

- Technical Skills: AutoCAD (2D/3D), STAAD.Pro (Basic), Microsoft Excel (Data Analysis, Spreadsheets), Quantity Surveying/Estimation.
- Regulatory Knowledge: Familiarity with National Building Code of the Philippines (NBCP) and DPWH Standard Specifications.
- Soft Skills: Analytical Problem Solving, Technical Report Writing, Team Collaboration, Time Management.

Section Order:

1. Contact Info
2. Education (Prioritize this section since experience is limited)
3. Technical Skills (Use bullet columns or a clean list)
4. Academic Projects & Affiliations (This replaces Work Experience)
5. Certifications & Licenses (e.g., COSH, Master Plumber, or Civil Service Eligibility if applicable. If none, omit this section.)

Final Instruction:

Do not add any fluff or vague filler text. Keep every bullet point result-oriented or skill-specific. Provide the final output ready for me to copy and paste into Microsoft Word or Google Docs.

Section 2 - LLM Output

LLM Output #1 (ChatGpt Gpt-5.4 mini)

KYLLE CHRISTIAN L. BARREDA

Altezza Grande, Catalunan Grande, Davao City, 8000
09094743104 | barredakylle@gmail.com | github.com/kclbarreda

EDUCATION

Ateneo de Davao University — Bachelor of Science in Civil Engineering
Expected Graduation: May 2027
Relevant Coursework: Structural Theory, Fluid Mechanics, Construction Materials, Geotechnical Engineering, AutoCAD, Project Management

TECHNICAL SKILLS

- AutoCAD (2D/3D)
- STAAD.Pro (Basic)
- Microsoft Excel (Data Analysis, Spreadsheets)
- Quantity Surveying and Cost Estimation
- Familiarity with National Building Code of the Philippines (NBCP)
- Familiarity with DPWH Standard Specifications
- Analytical Problem Solving
- Technical Report Writing
- Team Collaboration
- Time Management

ACADEMIC PROJECTS & AFFILIATIONS

Capstone Design Project | [Insert Date]

- Designed a [Insert Project Type] using AutoCAD and STAAD.Pro, applying structural analysis concepts to develop a safe and efficient layout.
- Prepared preliminary load calculations, member sizing, and basic quantity estimates for materials and construction requirements.
- Collaborated with team members to consolidate drawings, assumptions, and technical documentation for final submission.

Construction Materials Testing Laboratory | [Insert Date]

- Performed standard civil engineering lab tests such as slump test, sieve analysis, and concrete cylinder testing under instructor supervision.
- Recorded and interpreted test results to evaluate material properties and compliance with ASTM-based procedures.
- Prepared concise laboratory reports summarizing procedures, findings, and engineering observations.

Site/Design Study or Field Work Activity | [Insert Date]

- Conducted basic site inspection and documentation for a civil engineering coursework requirement.
- Assisted in preparing sketches, measurements, and field notes for reporting and design reference.
- Applied classroom concepts to assess site conditions, workflow, and construction considerations.

CERTIFICATIONS & LICENSES

- None listed

Kylle Christian L. Barreda

Education

Bachelor of Science in Civil Engineering

Ateneo De Davao University | Davao City, Philippines

Expected Graduation: May 2027

- **Relevant Coursework:** Structural Theory, Fluid Mechanics, Construction Materials and Testing, Geotechnical Engineering, Computer-Aided Design (AutoCAD), Construction Project Management.

Skills

- **Technical Skills:** AutoCAD (2D/3D), STAAD.Pro (Basic), Microsoft Excel (Data Analysis, Spreadsheets), Quantity Surveying & Cost Estimation.
- **Regulatory Knowledge:** Familiarity with the National Building Code of the Philippines (NBCP) and DPWH Standard Specifications.
- **Soft Skills:** Analytical Problem Solving, Technical Report Writing, Cross-Functional Team Collaboration, Time & Project Management.

Academic Projects & Affiliations

Capstone Design Project: [Insert Project Title, e.g., **Structural Design of a Mid-Rise Commercial Complex**] Ateneo De Davao University | [Month, Year] – [Month, Year]

- Designed and modeled a [Insert Scale, e.g., 3-story] structural framework utilizing STAAD.Pro and AutoCAD, strictly adhering to NBCP and local zoning regulations.
- Executed comprehensive structural calculations for dead, live, wind, and seismic loads to ensure foundational integrity and building safety.
- Developed a detailed Bill of Quantities (BOQ) and cost estimation spreadsheet in Microsoft Excel, reducing projected material waste by [Insert % or remove if inapplicable].
- Collaborated effectively within a [Insert Number]-person team to compile technical reports, engineering plans, and deliver a comprehensive final defense to faculty engineers.

Construction Materials Testing Laboratory

Ateneo De Davao University | [Month, Year] – [Month, Year]

- Performed rigorous material testing procedures, including concrete slump tests, sieve analysis of aggregates, and cylinder compression testing in compliance with ASTM standard specifications.
- Analyzed empirical data from laboratory tests to verify concrete mix design strengths, drafting weekly technical reports to document methodologies and yield results.

Philippine Institute of Civil Engineers (PICE) - Student Chapter

Ateneo De Davao University | [Month, Year] – Present

- **[Insert Role, e.g., Active Member / Committee Head]:** Participated in academic seminars and workshops focused on sustainable infrastructure, modern construction methodologies, and civil engineering ethics.

Certifications & Training

- **[Insert Certification, e.g., Construction Occupational Safety and Health (COSH) Certification]** | [Insert Training Provider] | [Month, Year] *(Note: Delete this section if you currently hold no certifications)*

Section 3 - Comparison Table

Structure

- **LLM #1 (ChatGPT 4o mini):** Follows the requested section order but includes a redundant "Certifications" section, which unintentionally emphasizes the absence of credentials.
- **LLM #2 (Gemini):** Demonstrates a stronger structure with better flow. Effectively prioritizes Education and introduces an "Affiliations" subsection to address the lack of formal experience.

Clarity

- **LLM #1 (ChatGPT 4o mini):** Generally clear but lacks specificity. Bullet points describe typical student tasks rather than highlighting candidate-specific contributions or outcomes.
- **LLM #2 (Gemini):** Highly effective. Skills are clearly categorized (Technical, Regulatory, Soft), and project descriptions incorporate precise engineering terminology (e.g., "dead/live/seismic loads," "Bill of Quantities").

Formatting

- **LLM #1 (ChatGPT 4o mini):** Uses plain text with an all-caps name. The layout feels flat and lacks visual hierarchy, making it harder to scan.
- **LLM #2 (Gemini):** Applies bold formatting strategically for section headers and roles. Maintains an ATS-friendly structure while achieving a clean, modern, and readable layout.

Overall Quality

- **LLM #1 (ChatGPT 4o mini):** Low. Requires significant revision, including removal of unnecessary sections (e.g., "None listed") and completion of missing details.
- **LLM #2 (Gemini):** High. Functions as a guided template with purposeful placeholders. Presents the candidate as organized, detail-oriented, and job-ready rather than simply "realistic."

LLM #1 (ChatGPT 4o mini): The structure is functional but extremely passive and incomplete. Leaving [Insert Project Type] and [Insert Date] blank makes the resume look like a draft rather than a finished product. Additionally, including a "Certifications" section that explicitly says "None listed" is a critical error that highlights a lack of qualifications rather than hiding it.

LLM #2 (Gemini): The output is significantly more actionable and professional. It formats the skills into distinct categories for better readability and, crucially, provides realistic, quantitative placeholders (e.g., "reduced material waste by [Insert %]"). The instruction to delete empty sections prevents the negative self-sabotage seen in LLM #1.

Overall Conclusion: LLM #2 produces a near-finished resume that only requires the candidate to fill in specific dates and project titles. LLM #1 produces a rough outline that would likely be rejected by recruiters if submitted as-is. For an entry-level engineer with no experience, LLM #2's approach of adding a student organization affiliation (PICE) and detailed project methodology adds necessary substance without lying.

Section 4 – Reflection (200–300 words)

Between the two outputs, **LLM #2 (Gemini) performed significantly better** because it functioned as a true collaborator rather than a passive form-filler. While LLM #1 largely repeated the bracketed placeholders, Gemini generated **actionable, industry-specific content** that required minimal editing instead of a complete rewrite. A key difference was how each handled "negative space." LLM #1 included a "Certifications" section labeled "None listed," which unintentionally highlights a gap in credentials. In contrast, Gemini strategically omitted the section and suggested removing it if empty, resulting in a more professional presentation.

In developing the final resume, two major improvements were implemented. First, all **bracketed placeholders were replaced with concrete and realistic details**. For example, [Insert Project Type] was refined into "Design of a Two-Story Residential Structure," and specific timelines (e.g., "August 2026 – December 2026") were added to demonstrate progression and experience. Second, the bullet points were enhanced with **quantifiable impact**. Instead of generic statements such as "prepared cost estimation," more precise outcomes were used, such as "reduced estimated material waste by 8%."

Section 5 – Final Resume

Kylle Christian L. Barreda
Altezza Grande, Catalunan Grande, Davao City, 8000
09094743104 | barredakylle@gmail.com | github.com/kclbarreda

EDUCATION

Ateneo de Davao University — Davao City, Philippines

Bachelor of Science in Civil Engineering

Expected Graduation: May 2027

Relevant Coursework: Structural Theory, Fluid Mechanics, Construction Materials and Testing, Geotechnical Engineering (Soil Mechanics), Computer-Aided Design (AutoCAD), Construction Project Management

TECHNICAL SKILLS

- **Design & Analysis:** AutoCAD (2D Drafting & 3D Modeling), STAAD.Pro (Basic Structural Analysis), SketchUp (Conceptual Modeling)
- **Project Controls:** Quantity Surveying, Cost Estimation, Microsoft Excel (Pivot Tables, Data Analysis), Bill of Quantities (BOQ) Preparation
- **Regulatory Knowledge:** Working knowledge of the National Building Code of the Philippines (NBCP) and DPWH Standard Specifications for Highways and Bridges
- **Soft Skills:** Technical Report Writing, Cross-Functional Team Collaboration, Analytical Problem Solving, Time Management

ACADEMIC PROJECTS & AFFILIATIONS

Capstone Design Project: Two-Story Residential Structure | Ateneo de Davao University

August 2026 – December 2026

- Led a 4-person team in the structural design and analysis of a 120 sq.m. two-story residential building using STAAD.Pro, ensuring compliance with NSCP 2015 seismic load provisions
- Performed manual verification of dead and live load calculations to validate software output, achieving a safety factor above 1.2 for critical structural members
- Developed a detailed Bill of Quantities and cost estimate in Microsoft Excel, identifying efficiencies that reduced projected material waste by approximately 8%
- Compiled complete technical documentation, including structural plans, design reports, and bar bending schedules for final presentation

Construction Materials Testing Laboratory | Ateneo de Davao University

January 2026 – May 2026

- Conducted ASTM-based laboratory tests such as slump testing, compressive strength testing, and sieve analysis for aggregates
- Analyzed and interpreted results to evaluate material performance and compliance with DPWH specifications
- Prepared structured technical reports summarizing procedures, findings, and engineering conclusions
- Maintained laboratory safety standards and ensured proper handling of testing equipment

Philippine Institute of Civil Engineers (PICE) – Student Chapter | Ateneo de Davao University

Member, August 2025 – Present

- Participated in technical seminars on sustainable construction, geotechnical investigation, and professional ethics
- Engaged in site visits to observe real-world construction processes and project management practices

CERTIFICATIONS & TRAINING

- Construction Occupational Safety and Health (COSH) Training | [Accredited Provider] | [Month, Year] (Optional: Remove if not yet obtained)
