SKILLS AND CAREER GOALS

Skill

Project Management: Organizing tasks, materials, and people to meet a deadline.

Problem-Solving: Finding practical solutions when a design doesn't work as planned on-site.

Technical Writing: Creating clear reports that explain complex engineering data to clients.

Short Term and Long Term

Secure an Internship: Gain hands-on experience at a construction site or an engineering firm to see how designs are built in real life.

Professional Engineer (PE) License: Obtain full licensure to sign off on official engineering plans and take on legal responsibility for projects.

*Structural integrity starts with the heart; a successful
future is one built with honest hands*
